

Products

- Meets or exceeds the performance characteristics specified in MIL-C-85528.
- For application on flange type cylindrical connectors. Self-centering design slips directly on connector flange. No tooling required.
- Adapters available for flush mounting applications such as those requiring RFI or EMI sealing.
- Easy removal and/or replacement. In the event of worn or damaged threads, Corner Clip-On Nuts are easily removed and replaced, either on the connector or the adapter flange.
- Available to fit a broad range of connector shell sizes from #8 to #25. Color coded for easy identification.
- Adapts easily to other corner fastening applications. Design requires less edge distance than conventional press nuts.
