

Products

- Offered in a wide range of metallic and non-metallic components that provide a unique means of securing insulation blankets to a structure.
- Monadnock's insulation fasteners utilize two basic methods for affixing insulation blankets. Blankets may be attached to a wide range of structural configurations with a broad series of metallic or non-metallic clips. Blankets may also be affixed with a series of metallic or non-metallic fasteners that pierce and captivate the blanket to the structure by clip-on, rivet or bonding techniques.
- Modular design concept enables user to satisfy numerous insulation fastening problems cost effectively with a minimum number of components.
